3. PERSONNEL: A. TDY's - [REDACTED]

4. RESEARCH and DEVELOPMENT: A. Hypoxia Warning System - The hypoxia warning system that was under consideration for installation in the MA-2 High Altitude Helmet has been discontinued.

halo parachute with 35 ft canopy into the 6-2 spectrum. This canopy will greatly decrease the pilots rate of descent, especially in areas of high terrain, and will subsequently lessen the pilots danger of being injured upon ground impact.

C. Parachuts - This organization has agreed to assist [] by relieving their dual canopy release parachutes and having them modified to incorporate a right hand rip cord release. We will ship the parachutes [] after completion of modification.
